

In the Specification:

Page 4, please substitute the second full paragraph as originally filed with the following paragraph:

-- The morpholine or piperazine derivative is a nitrogen heterocyclic compound of the formula:

(II)

wherein Y is -N or -O and R⁸ is an aminoalkyl group containing between 2 to 4 carbon atoms. Preferred as R⁸ are ~~2-aminoethyl, 2-hydroxyethyl~~, 2-aminoethyl and 2-hydroxyethyl. Further preferred are morpholine bottoms, the residuum obtained from morpholine processing, commercially available, for example, as Huntsman C-6 amine. --
